PRODUCT NAME: ZDS Qube Rodent Anesthesia Breathing Circuits

PRODUCT PURPOSE: The ZDS Qube delivers anesthetic gas with **increased efficiency and effectiveness** while it **decreases cost, pollution, and waste gas** contamination to the workplace

IMPORTANT FACTS CONCERNING THE PRODUCT AND ITS USE

1. **DarvallVet** is the North American Division of Advanced Anesthesia Specialists, a global anesthesia design and manufacture company founded and directed by a board-certified veterinary anesthesiologist. We bring a unique perspective to the solutions of longstanding challenges in researcher anesthesia.
2. **Waste gas contamination** of the workplace can be **prevented** using the ZDS Qube
 - a. Sealed nose cone diaphragms prevent gas leakage into the workplace
 - b. Low-flow, Zero Dead Space design does not require a high-flow scavenge system
3. ZDS Qubes provide **precise and predictable rodent anesthesia**
 - a. Uni-directional fresh gas flow assures fresh gas delivery and prevents rebreathing
 - b. Sealed diaphragm nose cone prevents leakage
 - c. Passive scavenge prevents venturi effect caused by high negative pressure scavenge systems on coaxial breathing circuits.
 - d. The unique design and aluminum construction of the ZDS Qube assures versatile and stable patient positioning.
4. The efficient ZDS Qube reduces gas flow by 80 – 90% which **resolves most hypothermia issues** for most procedures.
 - a. The **Heated ZDS Qube** provides warm inspired gas for longer procedures
5. The low-flow, predictable ZDS Qube reduces oxygen and anesthetic gas consumption by as much as 90%
 - a. Decreases cost
 - b. Decreases hypothermia
 - c. Decreases pollution
